experience

2014

Frog Design

San Francisco, California

Design Technologist Intern

- Worked with an agile development team in the process of finishing interaction models and beginning Android development for a major client.
- SenseSF, visualization software detailed in the Projects section below.

2014

Northfield Enterprise Center

Northfield, Minnesota

Small Business Generalist

- Developed a templating system to ease creation of social media campaign products for BrandYourself, a Northfield social media consultancy.
- Designed marketing materials for Leadership Tools, a Northfield based leadership consultancy.

2013

Obermueller for Congress

Minneapolis, Minnesota

Summer Finance and Marketing Intern

- Worked with data entry for prospective donors, and devised a method for entering donor information using OCR.

2006–2012

Marketplace Magazine

Pella, Iowa

Print and Web Designer

- Developed the first online edition of the magazine on their website.
- Designed client automobile magazine pages every two weeks.

projects

2014

SenseSF

A web application designed to provide simple data visualizations for temperature, humidity, sound levels, and ambient light sensor data in the frog San Francisco office. I constructed sensors and used five Raspberry Pi devices to provide JSON data used for the visualizations.

2014

Shareplay

<http://shareplay.me>

A concurrently edited playlist manager and music player that users can text message to add to the queue. Implemented with Meteor.js, Bootstrap, Beats Music API and Twilio in 36 hours at HackGT, a hackathon at the Georgia Institute of Technology.

2014

US Auto Links

<https://github.com/chetaldrich/usautolinks>

A web application designed to provide an access point for consumers looking for vehicles for sale using Python and PostgreSQL. Planning on optimizing for a proprietary version for use by Marketplace Magazine and several car dealers in the Des Moines area.
