experience

2014

Northfield Enterprise Center

Northfield, Minnesota

Small Business Generalist

- Developed a templating system to ease creation of social media campaign products for BrandYourself, a Northfield social media consultancy.
- Designed marketing materials for Leadership Tools, a Northfield based leadership consultancy.
- Fixed bugs in the Northfield Enterprise Center WordPress website.

2013

Obermueller for Congress

Minneapolis, Minnesota

Summer Finance and Marketing Intern

- Devised a quick method for entering donor information using optical character recognition, saving many hours of labor in data entry.
- Worked with data entry for prospective donors.

2006–2012

Marketplace Magazine

Pella, Iowa

Strategy/IT Consultant

- **IT:** Developed the first online edition of the magazine on their website.
- **Pre-Press:** Designed client automobile magazine pages every two weeks.
- **Distribution:** Reduced delivery fleet operating costs by \$2000 each year by developing route optimization techniques for delivering the Marketplace Magazine across Iowa and Nebraska.

projects

2014

Shareplay

<http://shareplay.me> for demo, <https://github.com/Kenadia/SharePlay>

A concurrently edited playlist manager and music player that users can text message to add to the queue. Implemented with Meteor.js, Bootstrap, Beats Music API and Twilio in 36 hours at HackGT, a hackathon at the Georgia Institute of Technology.

2014

TarGetHelp

<https://github.com/chetaldrich/targethelp>

A web application designed to connect customers and customer representatives via text. Implemented with Flask, Bootstrap, and the Twilio API in 24 hours at UHack at the University of Minnesota, making it to the top 20 projects in second round judging.

2014

Car Marketplace

<https://github.com/chetaldrich/CarMarketplace>

A web application designed to provide an access point for consumers looking for vehicles for sale using the Python CGI and PostgreSQL.
