education

2012–2016	**Bachelor of Arts** in Computer Science	Carleton College
Spring 2014	**Russian Language and Culture**	Moscow State University

Spring 2014 — Studied Russian language, history, and culture in Moscow and near Lake Baikal.

experience

2014 — Northfield Enterprise Center — Northfield, Minnesota
Small Business Generalist
- Developing a templating system to ease creation of social media campaign products for BrandYourself, a Northfield social media consultancy.
- Designed marketing materials for Leadership Tools, a Northfield based leadership consultancy.
- Fixed bugs in the Northfield Enterprise Center WordPress website.

2013 — Obermueller for Congress — Minneapolis, Minnesota
Summer Finance and Marketing Intern
- Devised a quick method for entering donor information using optical character recognition, saving many hours of labor in data entry.
- Worked with data entry for prospective donors.

2006–2012 — Marketplace Magazine — Pella, Iowa
Strategy/IT Consultant
- **IT**: Developed the first online edition of the magazine on their website.
- **Pre-Press**: Designed client automobile magazine pages every two weeks.
- **Distribution**: Reduced delivery fleet operating costs by $2000 each year by developing route optimization techniques for delivering the Marketplace Magazine across Iowa and Nebraska.

projects

2014 — Shareplay — http://shareplay.me for demo, https://github.com/Kenadia/SharePlay
A concurrently edited playlist manager and music player that users can text message to add to the queue. Implemented with Meteor.js, Bootstrap, Beats Music API and Twilio in 36 hours at HackGT, a hackathon at the Georgia Institute of Technology.

2014 — TarGetHelp — https://github.com/chetaldrich/targethelp
A web application designed to connect customers and customer representatives via text. Implemented with Flask, Bootstrap, and Twilio in 24 hours at UHack at the University of Minnesota, making it to the top 20 projects in second round judging.

2014 — Car Marketplace — https://github.com/chetaldrich/CarMarketplace
A web application designed to provide an access point for consumers looking for vehicles for sale using the Python CGI and PostgreSQL. Planning to implement a proprietary version for several car dealers in the Des Moines area.
